CET257 Enterprise Project: Assignment 2

Task B6: Presentation and Demonstration Plan

Team Speed (Team 6) · Lift Right

Client: Sulav G. Raj

1. Purpose

This is our plan for the 20-minute client presentation and live demonstration of Lift Right, with each team member's responsibility. The slides, with speaker notes, are provided as Lift_Right_Presentation_with_Notes.pptx, and the final application is in the Prototype folder with instructions.

2. Session Plan (20 Minutes)

Time	Section	Presenter	Slides
0:00 to 0:30	Welcome and introductions	Shilu Chuke	1 to 2
0:30 to 2:00	Problem and project overview	Shilu Chuke	3 to 4
2:00 to 3:30	Objectives and key features	Shilu Chuke	5 to 6
3:30 to 6:30	Technical architecture and stack	Namshu Hang Zhyedi Magar	13 to 14
6:30 to 15:00	Live prototype demonstration	Sparas Shrestha	7 to 12 and the live prototype
15:00 to 17:00	Team roles, challenges and roadmap	Swikriti Bashyal	15, 18, 19
17:00 to 19:00	Client questions	All, moderated by Shilu Chuke	20
19:00 to 20:00	Closing and thank you	Swikriti Bashyal	20

Slides 16 and 17 are the responsibility chart and plan, shown only if asked. Slides 13 and 14 are presented straight after slide 6, then the presenter returns to slide 7 for the demo.

3. Individual Responsibility Chart

Member	Role	Responsibility during the session	Time
Shilu Chuke	Team Leader	Welcome, project overview and objectives. Moderates Q&A and keeps the session on track.	About 4 min
Sparas Shrestha	Live Demo Lead	Operates the working prototype live: login, 360° navigation, load assessment, checkpoints, scoring and the admin view.	About 8 min
Namshu Hang Zhyedi Magar	Technical Lead	Explains the architecture and technology stack. Plays the backup video or screenshots if the live demo has problems.	About 4 min
Swikriti Bashyal	Documentation and Closing Lead	Team roles, challenges, roadmap and closing thanks. Tracks time throughout.	About 3 min

Questions: Shilu answers questions about the project and the client process, Sparas and Namshu answer technical and demo questions, and Swikriti answers questions about documentation and planning.

4. Live Demo Run Sheet (Sparas)

Time	What is shown
6:30 to 7:30	Open the landing page, create a worker account and log in.
7:30 to 8:30	Pre-start briefing: controls (W A S D, mouse look, E to lift, F for full screen), scoring and rules.
8:30 to 10:30	Walk to the first checkpoint and answer one knowledge check correctly and one wrongly to show both feedback messages.
10:30 to 12:00	Load assessment: choose a handling method and lift, carry and place the load.
12:00 to 13:00	Explain the bonus round and hazard stand-down events, and show the live timer, score and radar.
13:00 to 15:00	Log in as an administrator, show the Command Center and worker register, and export the CSV.

5. Backup Plan and Risks

Risk	Plan
The prototype does not load, for example no internet	The prototype loads its 3D library from the internet, so we check the connection before starting and keep a phone hotspot ready.
The live demo fails during the session	Namshu plays the recorded demo video, or shows screenshots, while Sparas restarts the page.
We run over time	Swikriti tracks time and signals at 6:30, 15:00 and 17:00. The demo may skip the bonus-round explanation if needed.
A question we cannot answer	Say so honestly, note it, and follow up by email after the session.

6. Before-the-Session Checklist

- Charge the laptops and open the prototype to check it works in the browser.
- Create a worker account and an administrator account in advance.
- Put the backup video and screenshots on the desktop.
- Open the slides with notes, and check the slide order (13 and 14 follow slide 6).
- Bring a printed copy of the responsibility chart and a timer.
