CET257 Enterprise Project: Assignment 3

Weekly Reflection: Week 1

Name	Shilu Chuke
Team	Team Speed (Team 6): Lift Right
Role	Team Leader and Project Manager
Week	Week 1 (to 17 July 2026)
Project phase	Form
Focus this week	Team formation, roles, rules and first client outreach

1. What I did this week

- Called and chaired the first team meeting. The team formed under the name Team Speed and I led the discussion of group rules: attendance, communication, deadlines, conflict resolution, task ownership and quality assurance.
- Facilitated the individual skills audits and role allocation. I was confirmed as Team Leader.
- Confirmed the training topic (manual handling and lifting safety in warehouses) and sent the first outreach email to the client, Sulav G. Raj, this week.

2. Supporting evidence

Held in my ePortfolio (evidence section): Group Registration Form; Individual Skills Audit Report; Group Roles Report; Group Rules and Governance; Weekly meeting minutes, Week 1; Client emails.

3. Reflection

What went well	The team agreed roles and rules by consensus in the very first meeting, and all four members attended. Allocating roles from the skills audits meant nobody was placed in a role they had no evidence for.
What was difficult, and what I would change	The minutes record no blockers, but the real risk was that the client might not reply. Without a client there was no brief to build requirements from.
How the group performed	Positive start. Everyone engaged with the rules discussion and accepted that client contact would go through me with a second member copied in.
Skills I used or developed	Meeting facilitation, coordination, written communication (outreach email), and drawing up enforceable rules rather than vague ones.
Plan for next week	Follow up the client email if there is no response and set up the recurring weekly meeting slot.
