CET257 Enterprise Project: Assignment 3

Weekly Reflection: Week 9

Name	Shilu Chuke
Team	Team Speed (Team 6): Lift Right
Role	Team Leader and Project Manager
Week	Week 9 (5 to 11 September 2026)
Project phase	Present
Focus this week	Final client presentation and feedback

1. What I did this week

- Sent the client a thank-you email confirming that the two scope adjustments were logged against the Requirements and project plan.
- Moderated the final client presentation, presenting the welcome, project overview and objectives, and moderating questions.
- Collected the client's signed feedback form: ratings of 4, 5, 5, 5 and 5 (24/25).

2. Supporting evidence

Held in my ePortfolio (evidence section): Client emails; Presentation plan and responsibility chart; Client presentation feedback form; Team photo at the presentation.

3. Reflection

What went well	The presentation followed the plan closely and the 24/25 rating was a good result for the team.
What was difficult, and what I would change	The most useful feedback (layout of selection options, more varied scoring, more engaging interaction) arrived at the very end, when there was almost no time to build it.
How the group performed	Each member knew their section and the backup plan. The team covered each other’s technical questions well.
Skills I used or developed	Presenting to a client, moderating Q&A and taking criticism without becoming defensive.
Plan for next week	Send the final thank-you email with the live prototype link, and begin planning the Assessment 2 tasks.
