CET257 Enterprise Project: Assignment 3

Weekly Reflection: Week 10

Name	Shilu Chuke
Team	Team Speed (Team 6): Lift Right
Role	Team Leader and Project Manager
Week	Week 10 (12 to 18 September 2026)
Project phase	Present
Focus this week	Closing the loop with the client and planning Assessment 2

1. What I did this week

- Sent the final thank-you email to the client with the live prototype link and acknowledged his input from the first call to the demonstration.
- Reviewed Assessment 1 and divided the Assessment 2 tasks (B1 to B7) among the team.

2. Supporting evidence

Held in my ePortfolio (evidence section): Client emails; B2 Zero-budget marketing plan.

3. Reflection

What went well	The client now had the working prototype link in writing, and sending it is recorded as a completed action in the marketing plan.
What was difficult, and what I would change	With deliverables due across several tasks, it was tempting to skip planning and just start writing. I had to hold the team to the rule that every task has an owner and a week.
How the group performed	Good agreement on who would take which Assessment 2 document. No conflict needed escalation.
Skills I used or developed	Written professional communication and re-planning after an assessment boundary.
Plan for next week	Start the client interaction report (B3) and collect all evidence.
